SCHEDULE OVERVIEW

Day 1

Monday, November 10th

9:00-9:30 am	Opening
9:30-10:45 am	EXAG Paper Session 1: Led by Kaylah Facey
10:45-11:15 am	Break
11:15-12:45 pm	Game Jam: Led by Fiona Shyne
12:45-1:45 pm	Lunch
1:45-3:00 pm	EXAG Paper Session 2: Led by Kaylah Facey
3:00- 3:30 pm	Break
3:30-5:00 pm	Demo Session: Led by Fiona Shyne

Day 2

Tuesday, November 11th

9:00-10:00 am	Keynote: Mike Cook
10:00-10:30 am	Break
10:30-11:30 am	INT Paper Session 1: Led by Olga Koldachenko
11:30-12:00 pm	Break
12:00-1:15 pm	EXAG Paper Session 3: Led by Kaylah Facey
1:15-2:15 pm	Lunch
2:15-3:30 pm	EXAG Paper Session 4: Led by Kaylah Facey
3:30-4:00 pm	Break
4:00-5:00 pm	Community Session Led by Kaylah Facey

Meet the Team

EXAG Organizers

Fiona Shyne

Northeastern University

Kaylah Facey

Northeastern University

Joshiah Boucher

Worcester Polytechnic Institute

Junwen Shen

University of Alberta

Image not available

Johor Jara Gonzalez

University of Alberta

INT Organizers

Mahdi Farrokhimaleki

University of Calgary

Parsa Rahmati

University of Calgary

Image not available

Olga Koldachenko

University of Calgary

Setareh Abhari

University of Calgary

Full Schedule

Day 1: Monday November 10th

9:00 - Opening

Led by Fiona Shyne

Opening Remarks from EXAG and INT committees

9:30 - Exag Paper Session 1

Led by Kaylah Facey

Papers

Unifying Behavior Trees and Logic Programming
Samuel Hill and Ian Horswill

Controllable, Demographically-Guided Character Generation using Stochastic Logic Programming
Ian Horswill

PCG-SAF: Procedural Content Generation via Self-Assembling Figures for Tabletop Games
Fiona Shyne and Seth Cooper

A Constraint-Based Graph Grammar Approach Unifying Level and Playthrough Generation
Seth Cooper and Mahsa Bazzaz

Procedural Level Generation via Program Inversion
Harper Noteboom, Kalyani Nair and Seth Cooper

10:45 - Break

With Coffee

11:15- Game Jam

Led by Fiona Shyne

Participate in a exploratory game jam session

12:45 - Lunch

Lunch not provided

1:45 - Exag Paper Session 2

Led by Kaylah Facey

Papers

laytrace Arc Search: A Tool to Explore and Evaluate Large Spaces of Playtrace Metrics Through User-Defined Curves
Samuel Shields, Noah Wardrip-Fruin and Edward Melcer

Evaluating the impact of MDP-based level assembly on player experience
Colan Biemer and Seth Cooper

Using Exploratory Agents to Evaluate Game Environments
Bobby Khaleque, Mike Cook and Jeremy Gow

Voxel-Based Spatio-Temporal Visualization of Gameplay Traces with Anomaly Detection
Ling Liu, Colan Biemer, Günter Wallner and Seth Cooper

Quest to Dungeon (QtD): Towards a Tool that Supports Collaboration between Narrative and Level Designers
Oscar Boutani, Sam Shariati and Alberto Alvarez

3:00 - Break

With Coffee

3:30 - Demo Session

Led by Fiona Shyne

Explore works in progress and interactives

Day 2: Tuesday November 11th

9:00 - Keynote Speaker

From Mike Cook

10:00 - Break

With Coffee

10:30 - INT Paper Session 1

Led by Olga Koldachenko

Papers

Amorphous Interpretations: Diverse Narrative Generation for Open-Ended Simulation Environments

Dipika Rajesh, Julian Togelius and M Charity

Designing a Modular, Scalable Benchmark for Narrative Experience Management

Molly Siler, Stephen G. Ware, Gage Birchmeier, Mira Fisher and Lasantha Senanayake

11:30 - Break

With Coffee

12:00 - Exag Paper Session 3

Led by Kaylah Facey

Papers

We Call This Controller Skip: AI for Speedrunning

Michael Cook, M Charity, Maren Awiszus, Alexander Dockhorn and Filippo Carnovalini

Pretraining Graph State Encoders for Real-Time Strategy Games using Graph Self-Supervised Learning

Pavan Kantharaju

Detecting Neural Network Driven Bots in Super Mario Bros

Caleb Cavilla and Jonathan Hudson

Towards Cognitive-Plausible Explanations for Board Game Agents with Genetic Programming

Manuel Eberhardinger, Florian Rupp, Florian Richoux, Johannes Maucher and Setareh Maghsudi

1:15 - Lunch

Lunch not provided

2:15 - Exag Paper Session 2

Led by Kaylah Facey

Papers

Procedural Content Generation in Minecraft via Disentangled Representation Learning Models
Tim Merino, Yifan Zhang and Julian Togelius

Narrative-to-Scene Generation: An LLM-Driven Pipeline for 2D Game Environments
Yi-Chun Chen and Arnav Jhala

A Markovian Framing of Wave Function Collapse for Procedurally Generating Aesthetically Complex Environments
Franklin Yiu, Mohan Lu, Nina Li, Kevin Joseph, Tianxu Zhang, Julian Togelius, Timothy Merino and Sam Earle

Generating Three-Star System Puzzles using Solution Enumeration Fitness for a Lattice Protein Folding Game
Yaejie Kwon, Fiona Shyne and Seth Cooper

The Nintendo Artificial Neural Network System
Carmine Guida and Lauren DeMaio

3:30 - Break

With Coffee

4:00 - Community Session

Led by Kaylah Facey

Townhall to give feedback about the workshop
